

KAYNO SPEIGHTS

Winston Salem, NC kaynospeights@gmail.com (336) 448-8854

OBJECTIVE

Motivated computer science student with a strong foundation in programming, database management, and software development. Experienced in collaborative projects and eager to apply problem solving and technical skills in real world environments.

EDUCATION

Winston Salem State University Computer Science GPA: 3.6	Anticipated Fall 2026
Forsyth Technical Community College Associate of Science	Graduated 2023

SKILLS

Python | Java | C++ | MySQL | HTML | CSS | JavaScript | Data Structures & Algorithms | Relational Databases | Team Collaboration | Problem Solving | Communication

PROJECTS

Electronic Gradebook | Python

- Developed a desktop based electronic gradebook application using Python and Tkinter to manage student records, assignments, grades, and progress reports.
- Designed and implemented structured data storage using JSON for saving classes, assignments, grades, and tracking missing work.
- Built interactive features including teacher dashboards, teacher login, student search functionality, and a parent access view to improve classroom data management.

Real Time System Resource Monitor | Python

- Developed a real time system resource monitoring application using Python, Tkinter, and psutil to display live CPU usage, RAM utilization, and disk read/write activity.
- Implemented multithreading to continuously collect and update operating system metrics without blocking the GUI, ensuring smooth and responsive user interaction.
- Engineered a structured data collection and processing layer to calculate disk I/O differentials and convert raw system calls into readable performance metrics.

Athlete Location Database | MySQL

- Designed and implemented a relational database to track athletes and their locations.
- Created tables with primary/foreign keys and enforced data integrity rules.
- Wrote SQL queries using JOINS, UNIONS, and aggregations to generate location-based reports.

RELEVANT COURSE WORK

Completed: Principles of Database Management (MySQL) | Data Structures (Java) | Information Security | Web Programming | Organization of Programming Languages | Operating Systems | Programming II (Java) | C/C++ Programming

In Progress: Analysis of Algorithms | System Design and Development | Hardware and Media Security | Computer Architecture
